MEMORANDUM FOR: Director of Information Technology
Director of Technical Service
Chief, Information Management Staff
Director of Communications

VIA: Chief, Policy Coordination Staff, DO

FROM: Duane R. Clarridge
DO/Chief of Operations for Counterterrorism

SUBJECT: FDLINK Data Base Terminal Interconnections

1. As discussed with personnel of addressee offices, the Counterterrorist Center (CTC) plans to establish a stand-alone image data base in support of FDLINK, a program to collect, collate, and analyze photographs of terrorist technical devices and related data.

2. Phase I (early FY 88) of this project requires the installation of an image creation computer terminal and data base at OTS and an image creation terminal at CTC. An encrypted data link will be needed to connect the CTC terminal to the OTS data base. Phase II (late FY 88) entails the addition of a small number of image creation stations (some overseas), linked to the OTS data base via Agency staff communications circuitry where possible. Phase III (FY 89) will see FDLINK output to other Headquarters data bases. The project will be funded by CTC (project FAN forthcoming). Most project preliminary research and planning has already been accomplished by CTC and we anticipate a minimum of support services and equipment will be required from other offices to get Phase I underway.
